

DRIVE BELT NOMENCLATURE

V-Belt Type	Numbered By	Part Number	Outside Length
Fractional HP	Outside Length	4L500	50"
Classical Multi-Plus	Inside Length	A48	50"
Fractional HP	Outside Length	5L500	50"
Classical Multi-Plus	Inside Length	B47	50"
Classical Cogged	Inside Length	AX48	50"
Narrow Deep Wedge	Outside Length	5VX50	50"

Width/Height	Light Duty	Classical Heavy Duty	Molded Cogged	Wedge Cogged
	LIGHT DUTY Fractional HP 			
		CLASSICAL HEAVY DUTY Jason Multi-Plus® - UniMatch® 		
		MOLDED COGGED Cogged allows smaller pulleys. Better head dissipation. 		
		WEDGE COGGED Cogged with smaller wedge operates on narrower pulley. 		

Belt sizes dimensions are nominal.

1. Cover - Rubberized Fabric

- Flexible, non-cracking, smooth running for long life.
- Oil, heat & abrasion resistant.

2. Load Section - Polyester Cords

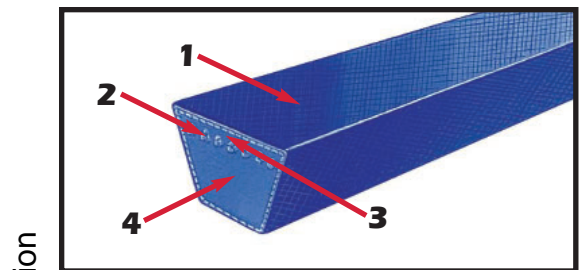

- Positioned to take tension in both FHP & Classical applications.
- Chemically treated, then fused prevents separation.

3. Load Carrying Section

- Special compound to resist stretch & fatigue.

4. Compression Section

- Elastomer resists compression fatigue.
- Dissipates internal heat build-up.
- Provides firm lateral pressure against groove sidewall and distributes the load to cords.
